

Family Surmacz

08.03.11

Cost estimation

We plan the following therapy for the child Marcin Surmacz, born on 14.01.2008:

Diagnosis: bilateral radial club hand

1. Operation: left arm: removal of the K-wire
right arm: implantation of a fixateur for wrist distraction

The costs for hospital and medical treatment will be euro
2.876,-.

2. Operation: right arm: removal of the fixator and radialization with muscle
transposition.

Costs: euro 3.800,-

Each amount has to be paid cash at the time of admission to the hospital, or it may be sent to the account of the hospital in advance (mentioning the name of the child):
